The professional shuttle snake series is a compact,light weight, versatile passive group of components allowing you to run audio signals over a single run of CAT5, 5E or 6 cables. With a roll of wire, these compact units are easily transported and/or stored solving dozens of live and/ or recording sound problems.
It is a passive unit, so you do not need power. It accepts "mic" level, line level, analog or digital audio and supports phantom power when using shielded CAT5 or CAT6 cables.
The basic units are a pair of passive units with bi–directional capability which can be input directly into analog or digital consoles. Designed to the highest professional standards it has a wide,flat frequency response, low THD and residual nose.
The InstaSnake™ has been factory tested to 1900 feet over CAT5 using low Z dynamic microphones....
